

Job Role: Junior Oracle Developer.

Competitive Salary.

Global is a truly inspirational business.

We are one of the UK's most dynamic fleet management and rental companies, and we are thinking bigger than ever before. We are taking on new challenges, expanding and finding new ways to deliver the best value. You could be part of this adventure.

Yorkshire based, with UK wide coverage, our fundamental principles of high quality professional service and tailored solutions are as true today as they were 20 years ago. Our strong reputation is key to our success. We offer fleet solutions to simplify fleet management. Our comprehensive and market leading range of products

and services includes vehicle daily rental, contract hire, remarketing, maintenance and servicing.

But it's not what we do, it's the way we do it that makes us so extraordinary. Customers are at the centre of our thinking and decision making all of the time.

Constantly innovating, the Global team is talented, diverse and hard working. It's a high octane performance led culture where we have fun. If you share our values, want to be challenged, get support for your professional growth and be well rewarded, you will fit right in!

What you will do:

- The Junior Oracle Developer will contribute as part of the IT team to the development of in-house applications and reporting systems to support the business in its drive to maximise performance and capitalise on growth.

HR@globalautocare.co.uk

How you will do it...

- Develop Oracle PL/SQL routines used by applications for data access
- Develop business critical applications and report mechanisms using the Oracle Application Express (APEX) development platform
- Deal with complex data models and relational database mapping
- Assist in gathering requirements from Directors, key managers and users, ensuring these are documented using appropriate methodologies such as business process modelling language (BPML), and creating user requirements specifications (URS) etc.
- Ensure appropriate testing of developed applications (system testing, user testing etc.)
- Help operational teams improve their processes and data management

What you need to be successful...

- Ideally, be working on or have completed a dissertation which incorporated APEX, or alternatively have a strong interest in and existing knowledge of APEX
- Some understanding and experience of implementing Oracle security, auditing and best practices preferred
- vEntry level knowledge and experience with advanced PL/SQL, stored procedures, triggers and replication would be helpful
- Some experience of working to standard procedures and change control
- Have completed an undergraduate degree in a Computer related subject or equivalent education and experience.
- Be enthusiastic, keen to learn and highly self-motivated
- Able to motivate and influence others, with the drive to take on new challenges and deliver exceptional results under time and resource pressure

Above all, you will need...

- A **passion** for learning and desire to succeed.
- Absolute **integrity**, consistently adhering to high quality professional standards, with sound business acumen.
- **Innovation** and a solutions focused approach.
- **Performance** driven and keen to deliver to the best of your ability every time, all the time.
- **Agility** - responsive to the needs of the customer.
- **Quality** focus and to aspire towards excellence in all things.
- To take **pride** in supporting the delivery of extraordinary fleet solutions.

And in return...

As Graduate Oracle Developer at Global, you will receive a competitive salary of up to £25,000 per annum. It's a great environment to work in. There's open communication with management, and ample opportunity to showcase your ideas to our shareholders and owners.
